With 10,105 stores in 34 countries, Carrefour is a major player in global retail with strong roots in its local communities. Currently operating in mainland France and its overseas territories, and in Europe, Latin America, Asia, as well as in North Africa and the Middle East, the Group relies on a network of integrated and franchised stores, along with the stores it runs with local partners. For Carrefour, being multi-local also means developing a selection of products and services specific to the region in which each store operates, tailored to fit the needs and profile of its customers. The teams form partnerships with local producers, hold sales events, recruit staff and contribute to economic, environmental and social projects at the local level. In the eyes of Carrefour, this is the purpose and benefit of a multi-local approach: stores that are close to their customers, committed with local stakeholders and working to develop territories, with the support, logistics, and power of an international retail Group.
As a multiformat, multichannel and multi-local retailer, Carrefour has all the resources to cater to the different needs of its customers – whether they live in an urban or rural environment, are a private or a professional client. In France or anywhere else in the world, Group stores are declined in different formats and channels.

### Hypermarkets

Around the world, Carrefour’s hypermarkets strive to provide a high quality offer and protect their customers’ purchasing power by offering low prices year-round.

### Multichannel retail
Carrefour continues its growth in food and non-food e-commerce, adopting a multichannel approach in which stores and the Internet interact to satisfy a customer base seeking bargains and practicality. A NEW CUSTOMER EXPERIENCE

In 2013, Carrefour launched a modernisation plan to improve the shopping comfort of its customers. The first stores, car parks and shopping centres were renovated to improve quality of service and welcome.

SHOPPING ONLINE

The Group continues to develop e-commerce and m-commerce solutions to enable its customers to shop anytime and anywhere, from a laptop computer, a tablet or a smartphone. Carrefour has also developed a wide range of digital services, primarily in stores, by focusing on their added value to the customer.

STORES INVOLVED IN THE LOCAL COMMUNITY

Stores are rooted in a neighbourhood, a town, a region. They are fully involved in developing these territories in a variety of ways: partnerships with local producers, cooperation with companies and work integration associations, employment action plans, socially-responsible projects, sponsorship, patronage, etc.

810 NEW STORES WORLDWIDE

Carrefour continues to expand and reach out to new customers. The Group opened 810 new stores during 2013, with new long-term prospects.
OUR PRODUCTS

Carrefour’s mix is based on unchanging principles: a wide selection, the lowest prices and irreproachable quality. To cater to its customers’ needs throughout the world, Carrefour refines its offer to provide a variety of fresh produce, products from local suppliers, major-brand products, essential non-food items, the best innovations and day-to-day retail services.

Non-food products
The non-food counters are organised into categories meeting customers’ basic needs: small household goods, textiles, home appliances (photo equipment, DVDs, sound and multimedia equipment). Carrefour products and national brands make up an offer that has something for everyone and every budget. As consumer habits change, Carrefour is adapting its offer and working on value for money and the style of its non-food products, increasing the generalist dimension of its hypermarkets, offering supermarket customers the local services they expect and developing an innovative and competitive offer on the Internet.

Local products
Carrefour has always given priority to products sourced locally, i.e. products from the country in which they are sold, to support local economic development. Nearly 75% of all Carrefour food products come from local suppliers. Carrefour strengthens this approach and gives its store managers – particularly in hypermarkets – more freedom so that they can select and offer their customers a very local selection of products sourced from producers located close to stores.

Everyday products
In the grocery, beverage and health-beauty departments, Carrefour offers a combination of products from both national and Carrefour brands. In all the countries in which it operates, the Group applies a strategy of everyday low prices and attractive discounts on the products that are popular with customers.

Fresh produce
Fresh produce is key to developing the attractiveness of our stores and as such it requires all the attention and expertise of our employees. In all of its store formats, Carrefour offers a wide selection of high-quality fresh produce in areas that have been specially designed to make shopping enjoyable: large stalls, easy-to-reach products and regional products – all designed to please our customers.

Trade services
From financing solutions and entertainment to pharmacy products and petrol, Carrefour services are available in the shopping centre and store car parks to meet customer needs with the same commitment: quality services at the best price. Reserving theatre tickets, buying flowers, printing photos or renting a vehicle for a move. Carrefour services, which differ depending on the country and consumer habits, make it easy for customers to optimise their shopping time and budget, and thus enhance their loyalty to Carrefour.
PRODUCT QUALITY, A DAILY COMMITMENT
Carrefour incorporates product quality and safety requirements at every level and at every stage. All product ranges must meet demanding, inviolable prerequisites.

THE GUARANTEE OF THE LOWEST PRICES
Every day, Carrefour works to guarantee the lowest prices on all of its products. The policy is based on offering everyday low prices and targeted promotions, and developing short supply lines and loyalty rewards.

Solidarity in action

Food exclusion encompasses a variety of different situations in different countries, calling for action on a number of fronts. The Group’s employees are therefore committed to solidarity activities on a daily basis. The activities are carried out as part of a flexible and wide-reaching scheme, with local, national and international actions.
